

Gábor Szigeti

Frontend developer

About me

I'm a Junior frontend Developer. I learn quickly and I am open to learning about new techniques and technologies. I try to keep the knowledge I have up to date and follow the new trends.

Thanks to my commercial background, I have a lot of experience in communicating with people and working in a team to achieve common goals. I also worked with webshops. Where I worked on SEO, I helped with design, and also played an important role in logistics. In 2019, we won the audience award in "The Website of The Year" poll.

Areas of specialization

Frontend • Web development
• Javascript • HTML • CSS
• TypeScript • Angular

Interests

My other goals are to expand the Frontend knowledge and acquire the Backend knowledge. My other goals are to expand the Frontend knowledge and acquire the Backend knowledge..
